A technical review of select de-risking schemes to promote rural and agricultural finance in sub-Saharan Africa, 2021.

This study explores five integrated risk management mechanisms segmented into two typologies: project-based de-risking schemes and stand-alone de-risking institutions. The schemes aim to derisk finance and investment in agriculture through a holistic combination of policy, financial and risk management instruments. (FAO)

Harvesting trees to harvest cash crops : the role of internal migrants in forest land conversion in Uganda, 2021.

This paper sheds light on how internal migration and commercial agriculture shape deforestation patterns across Uganda. The findings indicate that cash crop producers and inter-district migrants engaged in agriculture are linked with a significant rise in deforestation. (FAO)
