Дарения за библиотечните фондове: насоки за библиотеките, 2008.

Даренията са важна част от развитието и изграждането на библиотечния фонд. Настоящите насоки разглеждат основно въпросите, свързани с даренията, получени в резултат на активно търсене и договаряне от страна на библиотеката. По-накратко те засягат и въпроси, свързани с непоискани дарения. При приемане на дарения трябва да има прозрачност на процедурите за оценяване и обработка на дарителските предложения в съответствие с нуждите и политиката на развитие на библиотечните фондове. Alternatives to animal testing : proceedings of Asian Congress 2016, 2019.

The book is based on the most informative contributions delivered at the Asian Congress 2016 on Alternatives and Animal Use in the Life Sciences. It will be of value for those working in R&D, for graduate students, and for educators in various fields, including the pharmaceutical and cosmetic sciences, pharmacology, toxicology, and animal welfare. Agricultural Economics : current Issues, 2019.

The book is divided into four parts. The first part is simply an introduction to the field of agricultural economics. It charts the development of the field from its origin of farm management economics to the current state of a variety of subjects in various parts of the world. In the second section, an issue related to marketing is discussed. This is followed in the third section by an issue

related to water resource economics. In the last section the remaining three chapters are devoted to agricultural environment-related topics. All chapters present guidance for policymaking. (*doabooks.org*)

Новата аграрна политика на Европейския Съюз и нейното прилагане : учебно пособие, ръководство за преподавателя, 2007.

Ръководството е предназначено предимно за медиатори по обучение и се разделя на три основни дидактически области: Принципи на комуникацията – тази зона, насочена да формира умения от трансверзален тип, си поставя за цел да разгледа основите на комуникацията, изследвайки различни модели на междуличностна и групово комуникация, също и чрез използване на компютърни и телематични технологии ; Основни елементи на законосъобразността – втората дидактическа област цели разглеждане на вдъхновяващите принципи и на основните норми на законосъобразността, за да се очертаят подходящи стратегии за обучение и комуникация свойствени на този контекст ; Процес на обучение – тази зона разглежда основните характеристики на обучителния процес и основните типологии на системите на обучение съществуващи в Европа. Agricultural Chemistry, [2.] eBook ed., 2019.

The present book is a collection of ten original research articles and reports, associated with selected topics in agricultural chemistry. The discussed issues are organized in four sections: Classification and labeling of active substances in plant protection products, Environmental and stress plant physiology and behavior, Antimicrobial and antioxidant potential of plant extracts, and Pollutants analysis and effects. Biodiversity and health in the face of climate change, 2019.

This open access book identifies and discusses biodiversity's contribution to physical, mental and spiritual health and wellbeing. Furthermore, the book identifies the implications of this relationship for nature conservation, public health, landscape architecture and urban planning – and considers the opportunities of nature-based solutions for climate change adaptation. Animals and the Shaping of Modern Medicine : One Health and its Histories, 2018.

Ranging across the animal inhabitants of BritainTs zoos, sick sheep on Scottish farms, unproductive livestock in developing countries, and the tapeworms of California and Beirut, they illuminate the multi-species dimensions of modern medicine and its rich historical connections with biology, zoology, agriculture and veterinary medicine. The modern movement for One Health- whose history is also analyzed – is therefore revealed as just the latest attempt to improve health by working across species and disciplines. (*Springer*)

Cassidy, Angela. Vermin, victims and disease : British debates over bovine Tuberculosis and badgers, 2019.

This book integrates contemporary history, science and technology studies, human-animal relations, and policy research to conduct a cross-cutting analysis. It explores the worldviews of those involved with animal health, disease ecology and badger protection between the 1970s and 1990s, before reintegrating them to investigate the recent public polarisation of the controversy. Finally it asks how we might move beyond the current impasse. (*Springer Nature*)

Kirchhelle, Claas. Bearing witness : Ruth Harrison and British farm animal welfare (1920-2000), [2021?].

This book is the biography of one of Britain's foremost animal welfare campaigners and of the world of activism, science, and politics she inhabited. Here, historian Claas Kirchhelle explores Harrison's avant-garde upbringing, Quakerism, and how animal welfare debates were linked to concerns about the wider ethical and environmental trajectories of post-war Britain. The COST manual of laboratory animal care and use : refinement, reduction, and research, 2011.

Judge Your Practices Against This Benchmark Manual COST Action B-24 established four working groups to research and discuss issues relevant to laboratory animal science. These included the housing of animals, environmental needs, refinement of procedures, genetically modified animals, and cost-benefit analysis. Based on the groups' findings, The COST Manual of Laboratory Animal Care and Use: Refinement, Reduction, and Research provides a consensual European view of best practices for individuals and institutions caring for and working with laboratory animals. Fertilizer Use Optimization in Sub-Saharan, 2017.

This book contains 17 chapters providing details on decision tools that use linear programming to determine recommendations specific to a farmer's context intended to maximize profit from fertilizer use in sub-Saharan Africa. Chapters 1 and 2 discuss the

principles and approach, and spatial analysis of fertilizer use optimization, respectively. Chapter 3 covers integrated soil fertility management in sub-Saharan Africa. (CABI)

Invasive alien plants and their management in Africa, 2013.

The Removing Barriers to Invasive Plant Management in Africa Project, implemented in four African nations (Ethiopia, Ghana, Uganda and Zambia) between 2005 and 2010, stands out as one of the most wide-ranging and ambitious campaigns yet undertaken in the global effort to scale up the fight against damaging impacts arising from the spread of invasive alien species.
