Food loss analysis for grapes value chains in Egypt, 2021.

This study finds that the critical loss points of the Egyptian grapes value chain are at harvesting, wholesale markets and retail markets. Solutions to address grape loss include establishing quality standards for the market and improving post-harvest infrastructures. (FAO)

Предметни рубрики: грозде – загуба на храна – Египет

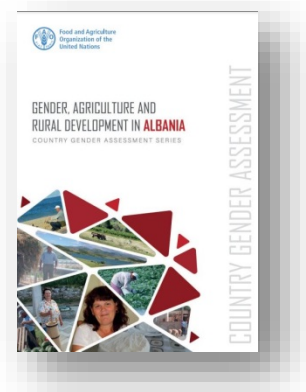

Сигнатура: ЕК

Food loss analysis for tomato value chains in Egypt, 2021.

This study finds that the farmers in the sample regions lack awareness about food loss and have limited information on production and post-harvest operations. Solutions include better market information, training and the establishment of direct marketing centres. (FAO)

Territorial management in indigenous matrifocal societies : case studies on the Khasi, Wayuu, Shipibo-Conibo and Moso peoples, 2021.

In recent years, the interests on the social world and the physical world of indigenous peoples have been on the increase, resulting in a gradual growth of literature on indigenous or tribal peoples of the world. Such works have provided an understanding on the situation of indigenous peoples. However, more studies are required on documenting indigenous knowledge and practices. (FAO)

The White/Wiphala Paper on Indigenous Peoples' food systems, 2021.

This Paper advocates that lessons can be learnt from Indigenous Peoples' approach to food, which will contribute to the resilience and sustainability of food systems worldwide, as well as supporting the wellbeing of Indigenous Peoples. In this vein, this Paper provides evidence on the sustainability of Indigenous Peoples' food systems, including the ways in which they have proven resilient over time. The Paper articulates the importance of respecting Indigenous Peoples' rights to ensure the preservation of their food systems, and the value this can add to tackling emerging challenges that face mankind. (FAO)

Antimicrobial Resistance Multi-Partner Trust Fund : Forging Tripartite collaboration for urgent global and country action against antimicrobial resistance (AMR) : Annual Progress Report 2020, 2021.

In 2019, the Tripartite Joint Secretariat (FAO, OIE, and WHO) launched the AMR Multi-Partner Trust Fund (MPTF) to scale up action in low- and lower-middle-income countries to address antimicrobial resistance (AMR) as well as set up joint, global-level activities. In 2020, the Tripartite put in place the necessary frameworks, tools, and standards to select countries and develop global programmes that will be supported by the MPTF. The following report will provide an overview of the country and global projects, their current implementation status, the fund's financial resources as well as the next steps. (FAO)
